Training for all your Health and Safety Courses

HEALTH AND SAFETY TRAINING

CMS acknowledges that for companies to become leaders in their field and maintain advantage over their competitors they must always be one step ahead with new training skills.

Comprehensive Training Plans can be organised

Considering this trend CMS design their Training Courses to satisfy this need within a customer-oriented environment.

REALISING YOUR DREAMS

In this day of investing in people and considering the wellbeing of the workforce, training the workforce becomes an important issue of their success. For this reason, CMS through its Training courses and Seminars aims to assist in bringing individuals and companies up to current legislation in terms of Environmental and Health. and safety issues. Furthermore, the specialised areas covered in

CMS courses are always designed to arm individuals and companies with tools and practices necessary to face successfully today's industrial problems and the challenging times ahead.

CMS PRODUCT

Currently, CMS deals with customers mostly from the contracting industry (Building, Electrical, Mechanical and Oil) but continues to expand into other fields. All the fields have one thing in common the requirement of professional assistance in improving their productivity, keeping their workforce safe and where possible in reducing costs.

ACHIEVING THE COMPANY'S MISSION

Continuous improvement can only be achieved through a qualified and experienced workforce.

CMS EXPERIENCE

CMS employs only qualified Trainers and Associates, and their experience covers a variety of fields. The most experienced tutor is chosen for each course.
